Sardine seining is a peculiar industry -Tit-Bits. "grounds" extend from Monterey to San Diego, the best point being at San Pedro, off Los Angeles. At San Pedro is the largest and best equipped sardine packing works in the world, and here the largest seines are used, capable of hauling in six or seven tons of sardines' at one time, several times larger than the "hauls" on the New England coast. During the summer months the schools of sardines at these points are larger than seen elsewhere in the world. When a school of sardines enter the purselike seine, the ends are drawn together and the seine with its cargo is bauled aboard the vessel. The haul is then taken to the packing house, which can bandle about seven tons daily. The sardines are graded, and inferior ones are thrown out. After being cleaned they are cooked by steam and soaked in olive oil. By a peculiar process the oil is forced into every part of the little fish. Then they are canned tightly, as the expression, "like sardines in a box," and labeled at the speed of about 100 in a minute. How so many are got into a box is a mystery to all save the expert canners.

The Little Japanese and Her Hair. The Japanese women's mir is twisted and colled into elaborate and fantastic ratterns which few eastern hairdressers uld imitate or equal,

The nairpins used are not so much for contining the locks in their places as for actual adornment and are very fashionable. They are of enormous size, seven or eight inches in length and half an inch wide and are made of various substances, tortoise shell, carved wood and ivery, many of them being composed of carved figures admitly pivoted so as to appear to dance at every breath drawn

Others are made of glass and are hollow and nearly filled with some bright colored liquid, so that at every move-ment of the head an air bubble runs from one end of the pin to the other, producing a most curious effect in a strong light.

Sometimes an extra fashionable woman will wear a dozen or more of these season. pins in her hair, so that at a little distance her head looks as if a bundle of firewood had been closely stuck into it.

Didn't Know His Own Song. A writer in Bird Lore says: "Several years ago, when in a western town, I was taken to a neighbor's to see his birds. Hour eages swing in the shelter of a commodious perch. One contained a red winged blackbird that had been taken from its nest when very young and brought up by hand. His associates were a canary, a bluejay and an oriole store and had there learned its song. The bluejay and eriole had been taken from neighboring nests and had no doubt picked up the characteristic notes of their their kind that inhabited the vicinity, but an he's lifted off his fate by an automo-it was many miles to the nearest swamp bile. He picks himself up, goes home an or lowland where one might find a red winged blackbird. This red wing had learned perfectly the notes of his caged companions and had picked up some but not one note of the red winged blackbird did he know."

A Fatal Joke.

Hungarian jokes are dangerous. A "I see," said the farmer, "that you have ty made a jesting remark to a landed ne wrote up as the proud father of a new proprietor, who did not understand it and at once thrashed the professor. "Yes," said the editor of the country They, in consequence, fought a duel with basket."-Washington Star. through the squire's head.

> "Well, Dave Henderson may think he can fill Tom Reed's shoes and his toga, but he'll have to weaken on one thing." What's that?"
